Exercises – Week 2

1. Add Five different pages to the site and link them via navigation.
2. Use a fragment to add a footer to each page. The footer should contain some text.
3. Modify the application so that the home page displays the current date and time (formatted).
    a. See: https://www.tutorialspoint.com/java/java_date_time.htm
4. Deploy your completed Spring web app to Azure.
    a. The Azure web app created last week can be used but you will need to change the app container from Netty to **Tomcat** (latest version) and delete **ROOT.war** and the **ROOT folder**
